Professional Experience

Platform Engineer
David AI July 2026 - Present

- Built cost attribution system mapping infrastructure spend to internal projects, enabling data-driven business decisions
- Developed **Temporal** workflows in **Go** on **EKS** for audio data pipelines processing petabyte-scale datasets
- Designed **S3** and **PostgreSQL** storage for audio data, partnering with product and ML teams to ensure scalability and data integrity

Senior Software Engineer
dbt Labs August 2024 - July 2026

- Spearheaded the development of UI rework, increasing weekly active users by 15%
- Led zero-downtime migration of high-throughput runs data into a right-sized service, reducing infrastructure spend and decreased on-call burden
- Mentored junior engineers through code reviews and pair programming, establishing onboarding processes that reduced time-to-first-change from 1 week to 1 day

Senior Software Engineer
SailPoint Jan 2022 - July 2024

- Developed large-scale features for IdentityNow Workflows, a low-code automation platform built with **Go**, that became a key enterprise upsell driver
- Re-architected execution flow to improve **DynamoDB** access patterns, leading to 77% cost savings
- Implemented workflow execution archival feature using **S3**, resulting in 23.6% increased customer adoption
- Led development project of actions versioning feature, enabling team to develop new actions without risk

Full Stack Developer Intern May 2021 - Aug 2021
Citi July 2020 - August 2020

- Migrated legacy infrastructure from monolithic architecture into microservices, resulting in a 32.6% build time decrease
- Created internal dev tools using **Angular** and **Java/Spring**, yielding a 15.6% productivity increase

Projects

TA Application System *React, Node.js, PostgreSQL* https://utapcsc.utm.utoronto.ca/utap/

- Delivered key features expanding the application management process
- Resolved 1000+ accessibility issues to achieve WAI-ARIA compliance
- Integrated E2E testing into **CI/CD** pipelines using **Cypress**

Education

University of Toronto
HBSc Computer Science Specialist, Mathematics Minor

Technical Skills

Programming Languages:	Go, Python, Rust, Java, JavaScript, TypeScript, HTML, CSS
Frameworks:	React, Django, GraphQL, Angular, Express, NextJS, Spring
Databases:	PostgreSQL, DynamoDB, S3, MongoDB, Neo4j
Tools:	Git, AWS, Docker, Kubernetes, Kafka, Prometheus, Grafana, Temporal
Certifications:	AWS Certified Developer, PagerDuty Incident Responder, dbt Fundamentals
